F Flexo Manufacturing Corporation · Supplier Invoice Portal

Staff Quick Guide

Review supplier invoices, schedule Friday check releases and record payments.

fmcai70.github.io/FlexoSupplier/staff

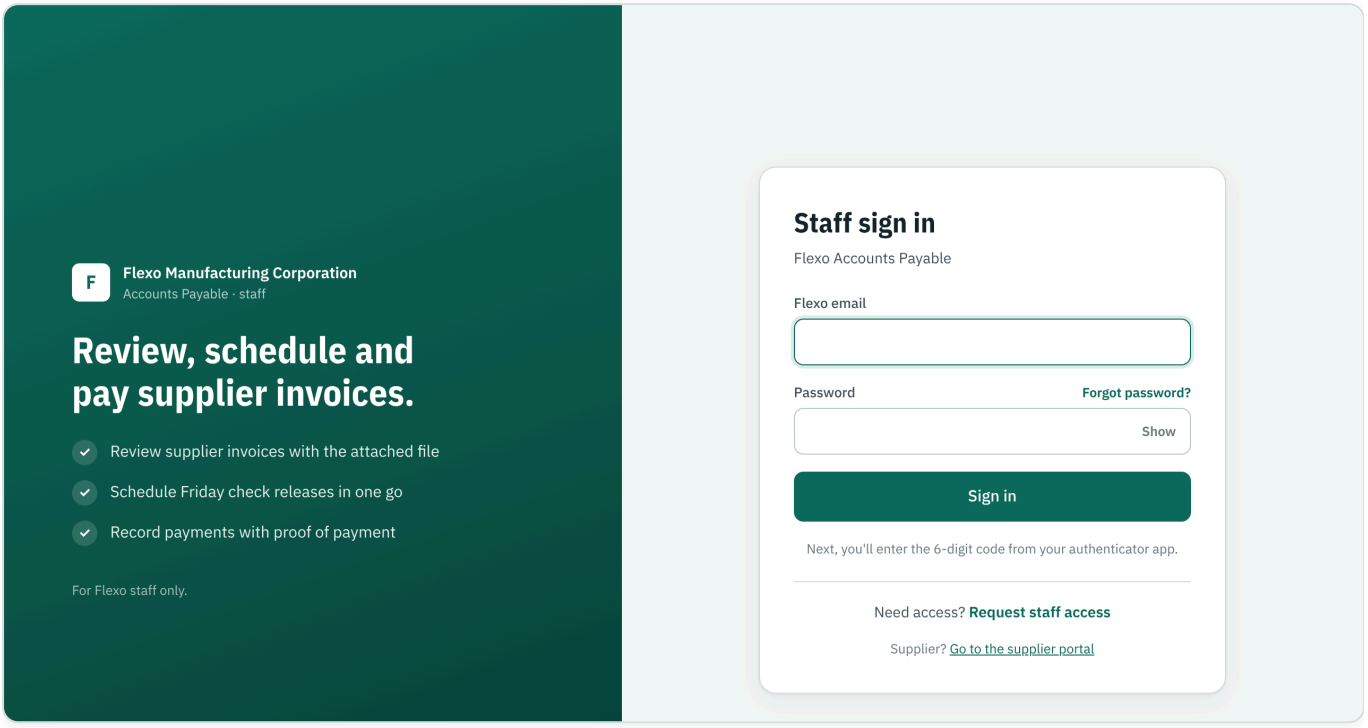

For Flexo staff only. Use the **staff link** above (bookmark it). Suppliers use the main portal link.

1 Get access

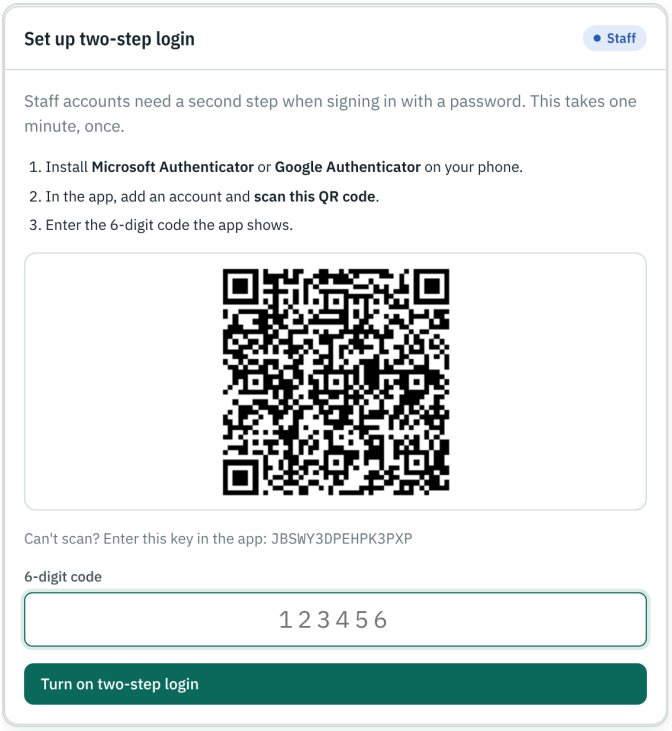

On the staff page click **Request staff access** and sign up with your **@flexo.com.ph** email. Other email addresses are refused. An **admin** approves your request under **Accounts**.

2 Sign in with two-step login

Staff sign in with email + password **and** a 6-digit code from an authenticator app. A password alone gives no access to invoices.

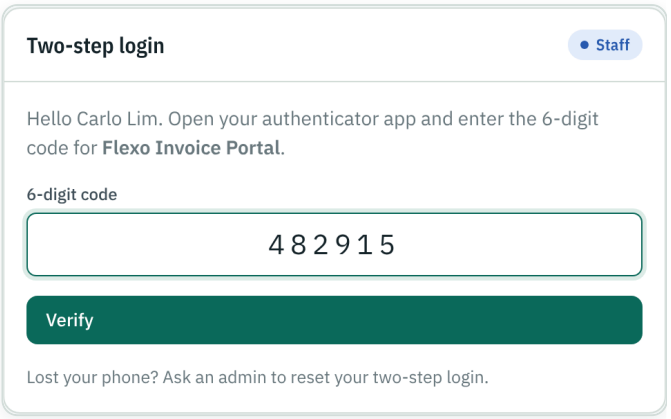

First sign-in: set up your authenticator (one time)

1. Install **Microsoft Authenticator** or **Google Authenticator** on your phone.
2. In the app tap **+ / Add account → Other account** and scan the QR code.
3. Type the 6-digit code from the app and click **Turn on two-step login**.

Every sign-in after that

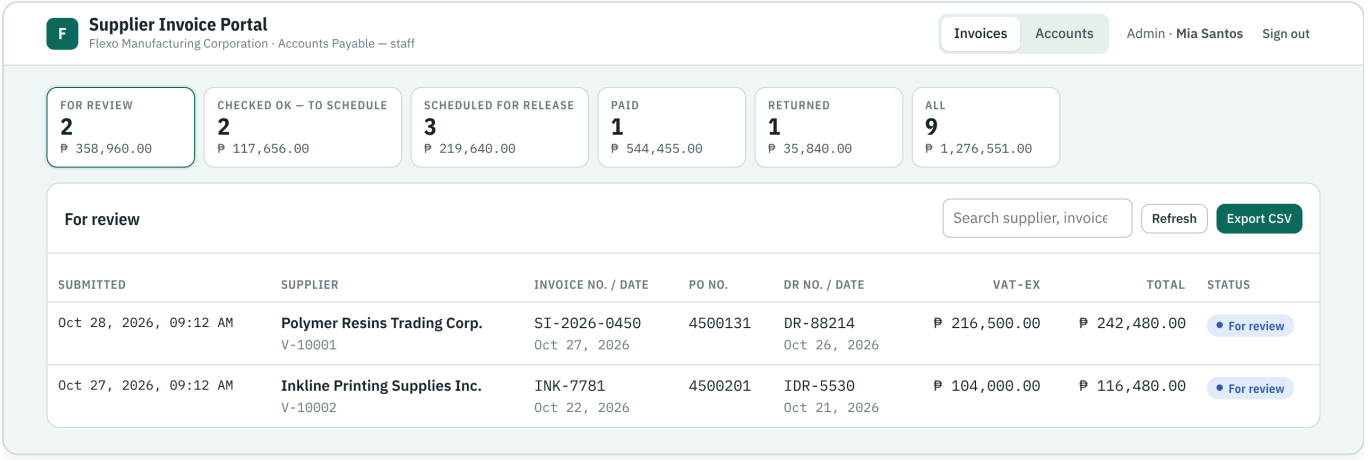

Enter the current code from the app. It changes every 30 seconds. If a code is refused, wait for the next one.

Lost or new phone? Ask an admin to reset your two-step login. You'll scan a new QR code at your next sign-in.

3 The Invoices dashboard

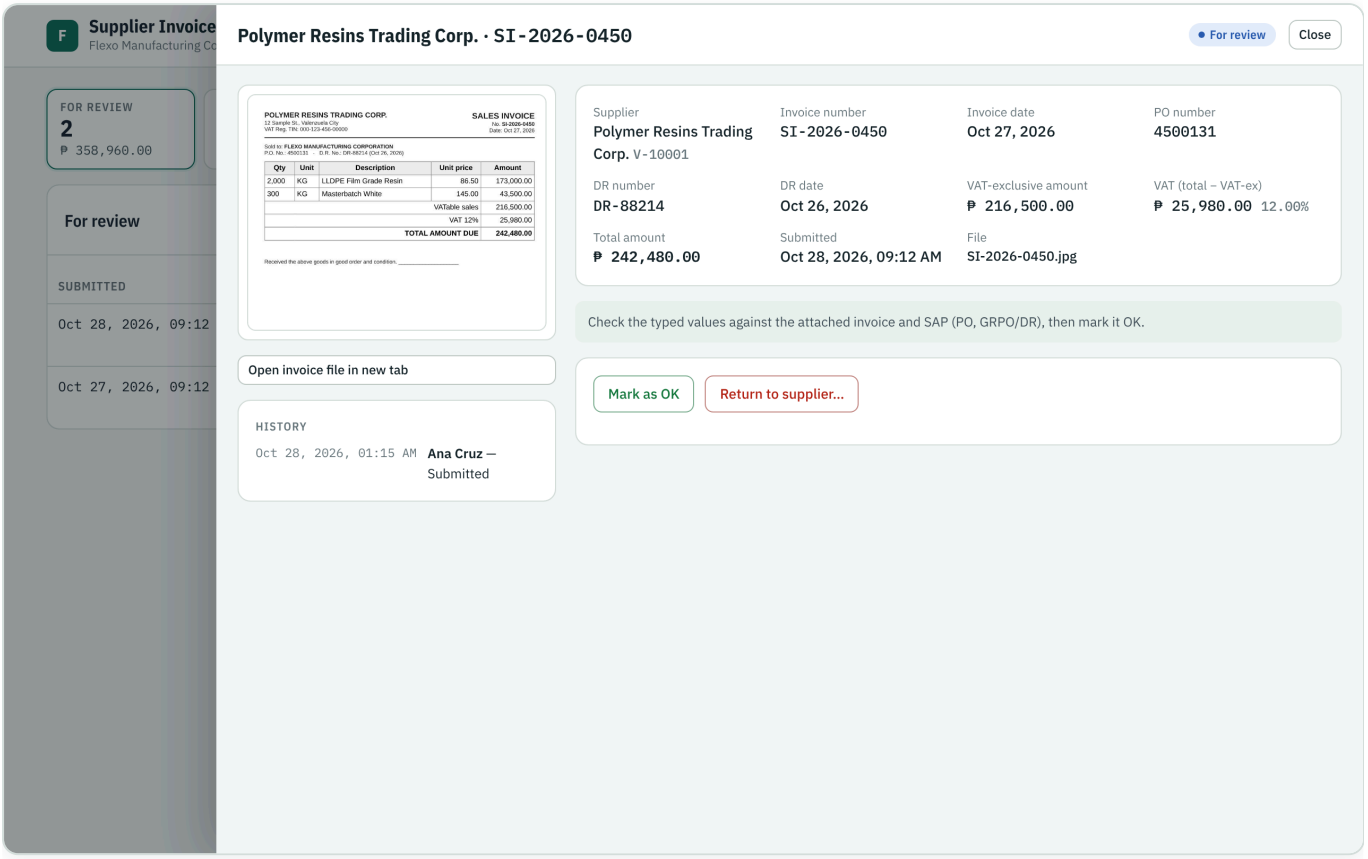

The boxes at the top show how many invoices are at each step, with their total amount. Click a box to see that list, and click any row to open the invoice.

Box	What to do
For review	New submissions: check them and **Mark as OK** or **Return**.
Checked OK — to schedule	Accepted invoices: set the Friday check release.
Scheduled for release	Waiting for the check run: **Mark as paid** with proof.
Paid / Returned / All	History. Use the search box and **Export CSV** for reports.

4 Review an invoice

The invoice file is shown on the left, and the supplier's typed details on the right. Check them against the file and SAP (PO, GRPO/DR).

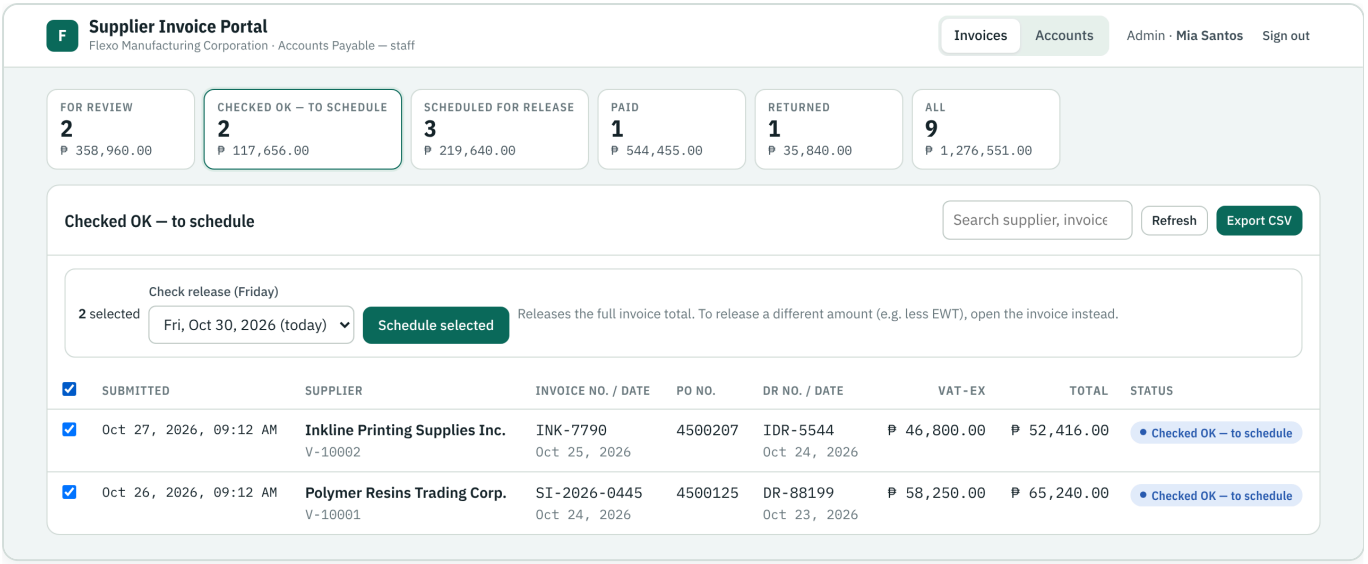

- **Mark as OK**: the invoice is correct and moves to *Checked OK*.
- **Return to supplier...**: type a clear reason. The supplier sees it and gets an email, then can correct and resubmit.
- Yellow warnings appear when the VAT isn't about 12%, the DR number is on another invoice, or the invoice number was used before.
- Typed values can't be edited by staff. If they're wrong, return the invoice.

5 Schedule the check release (Fridays)

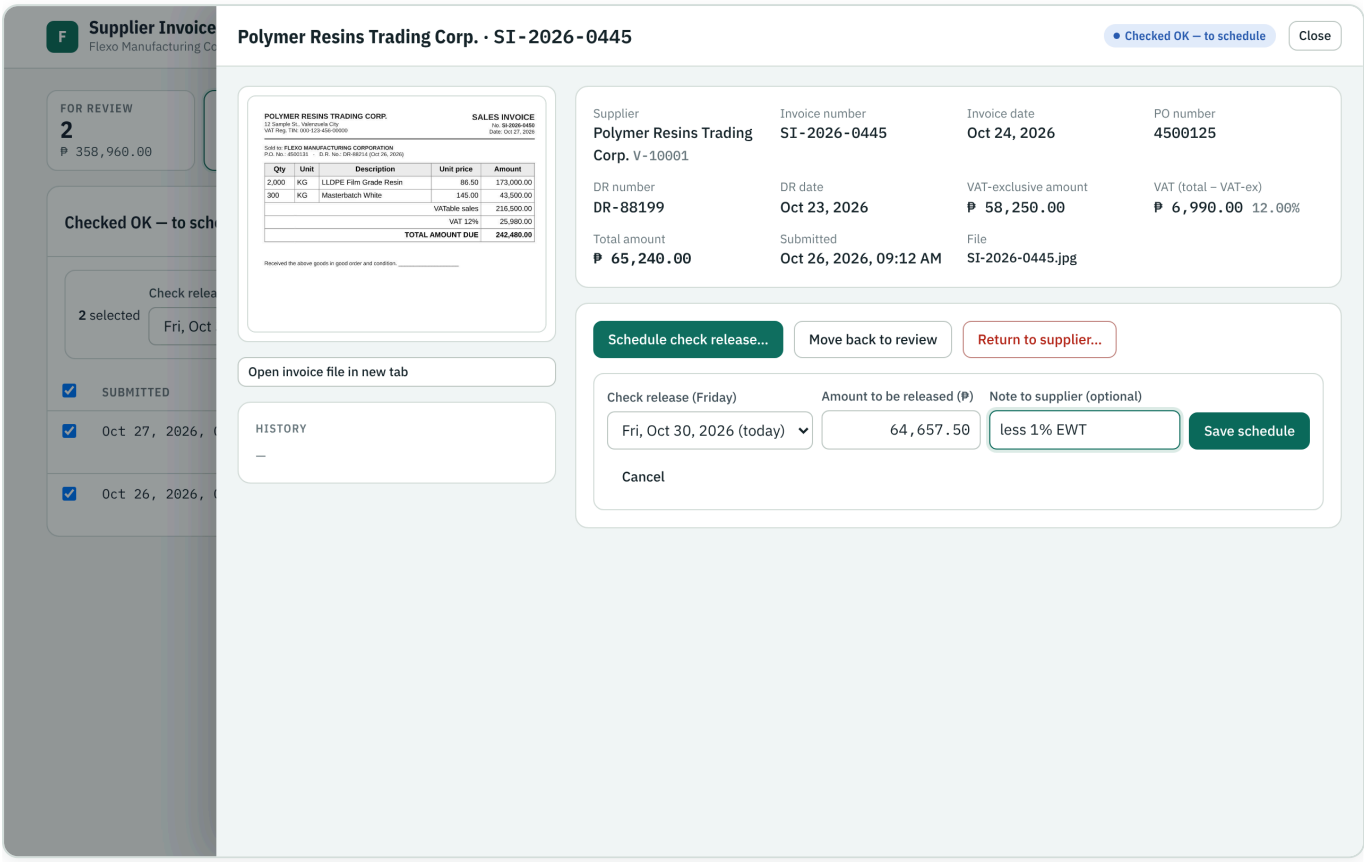

Several invoices at once

In **Checked OK — to schedule**, tick the invoices, choose the Friday, and click **Schedule selected**. This releases the full invoice total for each.

One invoice with a different amount (e.g. less EWT)

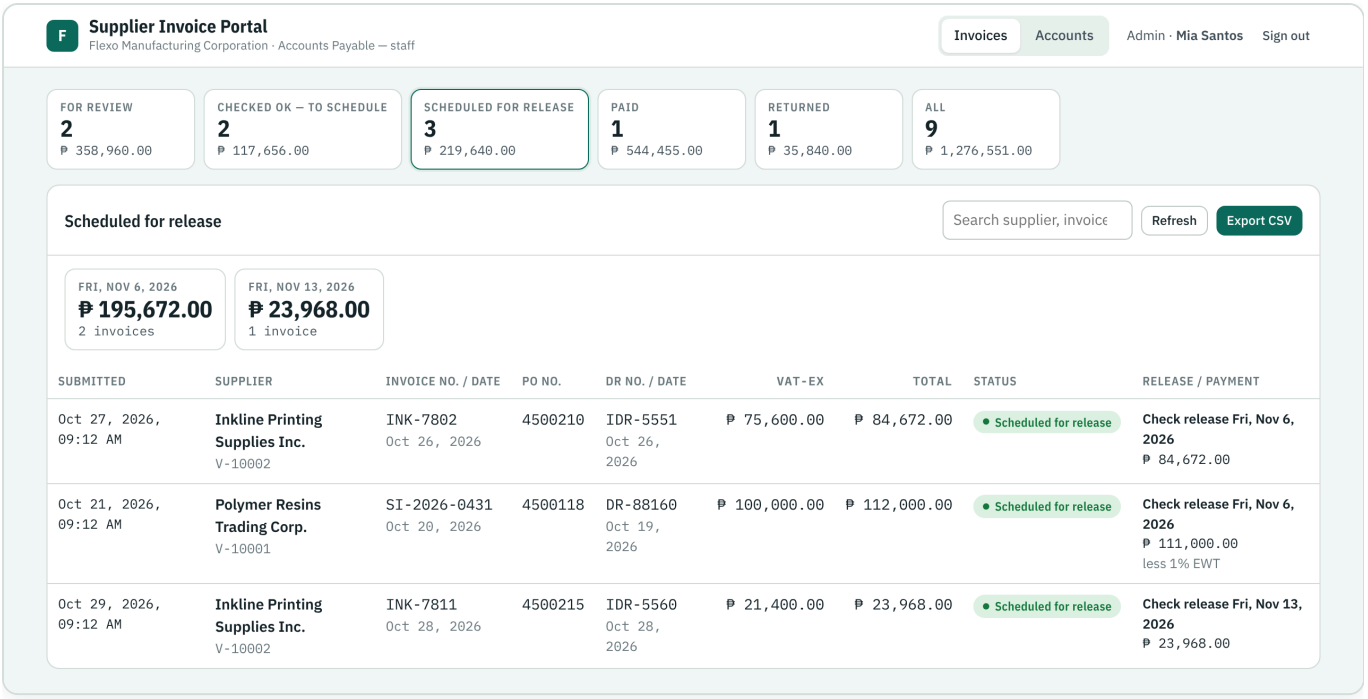

Open the invoice and click **Schedule check release…**. Choose the Friday, set the **amount to be released** (it can't be more than the total), and add a **note to the supplier** such as *less 1% EWT*. Click **Save schedule**.

> The supplier sees the date, amount and note, and gets an email. You can **Change schedule** or **Unschedule** until the invoice is paid.

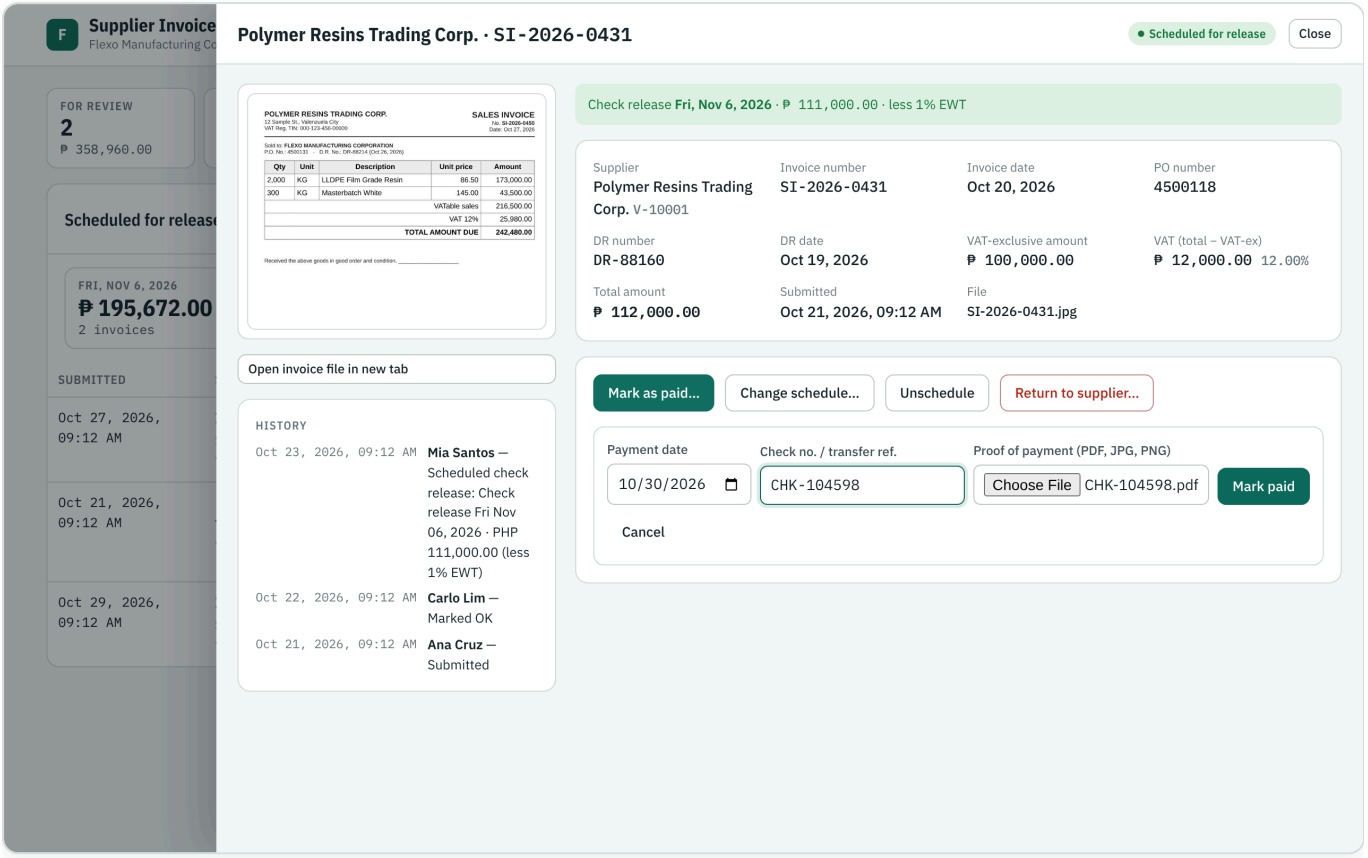

6 Friday check run and payment

Scheduled for release shows the total for each Friday. Use it to prepare the checks, and **Export CSV** if needed.

Mark as paid

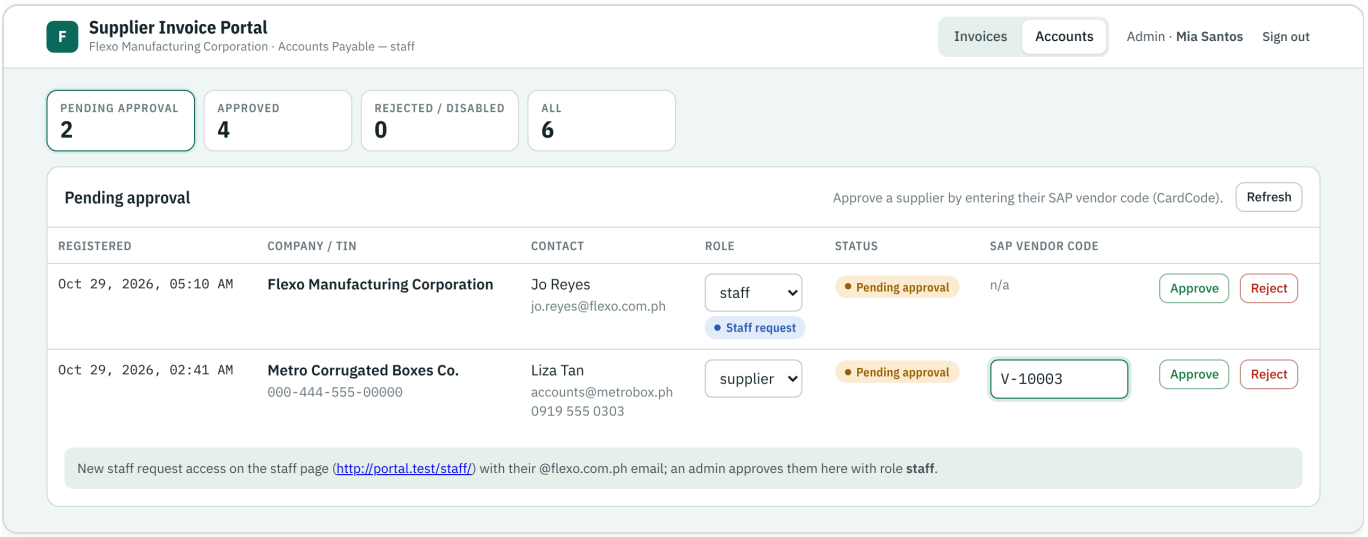

Open the invoice and click **Mark as paid…**. Enter the payment date and check/reference number, attach the **proof of payment** (PDF, JPG or PNG; required), and click **Mark paid**.

A paid invoice is final and can't be changed. The supplier gets an email and can open the proof of payment.

7 Approve supplier accounts

Go to **Accounts → Pending approval**. Check the company name, TIN and contact, type the supplier's **SAP vendor code (CardCode)**, and click **Approve**. Use **Reject** (with a reason) for accounts you don't recognise, and **Disable** to stop an approved supplier.

Staff requests are marked Staff request with role **staff** already chosen. Only an **admin** can approve them.

8 Automatic emails

When	Who gets an email
A supplier signs up / a staff access request	AP mailbox
A new invoice is submitted	AP mailbox
Account approved or rejected	Supplier
Invoice returned / scheduled / schedule changed / paid	Supplier

> Every action is recorded in the invoice's **History** with the staff member's name and time.
